## 1.0 – Presentación

Poder presentar el informe anual de HEGAN es siempre de orgullo, pues un año más el colectivo al que representamos ha seguido contribuyendo – con vigor - al desarrollo de la economía, y en particular de la industria aeronáutica y espacial.

Con un crecimiento de la facturación superior del 16% sobre 2015, las organizaciones asociadas al Cluster de Aeronáutica y Espacio del País Vasco - HEGAN - han alcanzado en el ejercicio 2016 una cifra de ventas de 2.247 millones de euros en todas sus plantas repartidas por todo el mundo. Así, este sector mantiene su aportación al del PIB industrial de Euskadi en torno al 6%. Las exportaciones totales superaron por cuarto año consecutivo los 1.000 millones de euros, alcanzando la cifra de 1.366 millones de euros. Las empresas ubicadas en Reino Unido y Francia son los principales destinos de los trabajos, seguidas de las de Estados Unidos y Brasil. Conviene indicar si a las exportaciones de los asociados sumamos las ventas internas (nacionales) a OEMs, Consorcios internacionales o Programas globales, el resultado es un 'índice de internacionalización' que superaría el 89% de la facturación.

El esfuerzo inversor en I+D+i de esta industria alcanza los 150 millones de euros siendo muy elevado el esfuerzo de la autofinanciación -el 87% del total de esa inversión - con 1.366 personas dedicadas a actividades de I+D (72 personas más que el año anterior). Y podemos dar la alegría de que el empleo de este periodo volvió a crecer, con un 9,4% de incremento medio en todas las plantas y del 7% en las instalaciones del País Vasco donde aumentó en casi 300 nuevas contrataciones, contando con 4.519 personas trabajando directamente en este sector.

Estos datos confirman la solidez de la industria aeronáutica y espacial vasca, una la tendencia del sector a seguir generando crecimiento económico y empleo de calidad.

En cuanto al futuro, el sector aeronáutico mantiene una gran resistencia. Así entre 2017 y 2035 se estima que se doblará la flota actual de aviones de pasajeros, por lo que en este periodo será necesario entregar cerca de 33.000 grandes aviones comerciales, y más de 6.000 aviones regionales. De hecho, se estima que durante 2017 se producirán un total de 1.456 aeronaves comerciales. En este contexto, las previsiones de los socios del Cluster HEGAN para 2017 son moderadamente optimistas, pero conservadoras. Aunque continúan las previsiones favorables a medio y largo plazo y el sector se encuentra inmerso en una etapa de fuerte crecimiento de producción, sin embargo la incertidumbre generada por los cambios socio-políticos surgidos en el último periodo nos hacen ser cautos, por lo que para el 2017 estimamos un incremento de la facturación del 2% respecto al año anterior, en línea con las previsiones del sector.

## 1.0 – Presentación

Por todo esto, la situación de la industria aeroespacial vasca necesita preparar un futuro para mantener la competitividad, asegurar la posición en el mercado a largo plazo de las empresas, mejorar la eficacia, responder a la evolución permanente de los requerimientos tecnológicos del sector, a la creciente presión sobre los costes de los suministradores para reducir los precios de las aeronaves ofertadas o a la creciente competencia de nuevos países que se incorporan a la oferta del sector y que están respaldados por la capacidad de compra de sus gobiernos y empresas (China, India, Singapur, Emiratos...).

En consecuencia, es necesario seguir manteniendo el liderazgo de los Tier-1 en tecnología e innovación y desarrollar todos los eslabones de la cadena de valor. El sector necesita también contar con medidas financieras específicas para poder abordar el lanzamiento de nuevos programas que pudieran surgir.

No podemos dejar de destacar este año la consolidación del Centro de Fabricación Avanzada Aeronáutica (CFAA) y la progresiva incorporación de nuevos socios dentro de la Asociación Cluster HEGAN y de la entidad que ostenta la representación industrial en el CFAA. Estos hechos sin duda fortalecen la competitividad general del sector, pues facilitarán la diversificación de la oferta, la posibilidad de encontrar sinergias y la aportación de conocimientos en áreas de mejora de los procesos de fabricación.

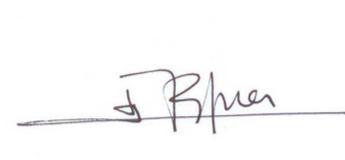

Finalmente, debemos hablar del Plan Estratégico 2017-2020, un trabajo compartido vivido en el seno de HEGAN que recoge precisamente estos y otros retos, al tiempo que alude a la intención de diseñar un futuro colectivo para el sector, con el fin de jugar un papel relevante en las cadenas de valor del sector a nivel mundial y con el compromiso de las empresas que forman parte de esta industria en el desarrollo del bienestar del territorio.

En las próximas páginas podréis conocer de primera mano las principales actividades de la asociación y de sus miembros. Muchas gracias.

### 2.2 HEGAN 2016

Como comentamos hace ya cuatro años en estas mismas líneas, en la primavera de 2012 comenzamos otro proceso de reflexión estratégica. El proceso nos marcó las líneas de trabajo generales que iríamos desplegando en acciones concretas hasta el año 2016, año de finalización del periodo de reflexión y de balance del mismo.

Desde el comienzo del despliegue de los retos estratégicos de aquella Reflexión Estratégica (RE1316) se ha venido trabajando en la dinamización de grupos de empresas con intereses compartidos ya sean en áreas de desarrollo tecnológico como no tecnológico e internacionalización, y siempre con objetivo de apoyar la mejora de la competitividad en cooperación; a este trabajo diario, se le ha sumado la de realizar la Reflexión Estratégica del siguiente periodo de manera interna: el propio equipo de HEGAN sería el responsable de la gestación del Plan Estratégico 2017-2020 (PE1720) que nos ha dado la ruta compartida para los próximos 4 años.

## 4.0 – Agradecimientos 2016

Confianza para generar colaboración y así aportar más valor: este es el ‘lema’ que hemos hecho nuestro para trabajar como asociación cluster, es decir, como ‘entidad para la colaboración’ –así las llama Michael Porter en su modelo–, con misión de generar mayor actividad económica ‘moviendo’ a los agentes que forman el cluster natural.

Este ha sido nuestro empeño –con nuestras ‘batallas’ personales y grupales por mejorar– y el de todos los que soportáis esta entidad de tantas maneras para que pueda dar el servicio a la sociedad que le acoge.

Desde el equipo de HEGAN queremos agradecer vuestro compromiso y pediros que éste sea permanente: nos necesitamos para este ilusionante proyecto.
